

FINAL Case Label & Data Elements for Industry Use V 1.2 March 2021

This common label was developed by industry for use throughout the U.S. and Canadian supply chains regardless of vendor or buyer.

FINAL

Sample Case Label:

(Please note font sizes used are in Swis721 Cn BT – If a different font is used please strive to maintain a similar size.)

GS1-128 Barcode including:
GTIN, Date (AI 13 or 15), Lot Number (Font Size 10)

The label features a large GS1-128 barcode at the top. Below it is the GTIN: (01) 3 0071430 01105 9 (13) 201205 (10) 2071231339. The main product name is **STRAWBERRIES/BAIES FRAISES** in a large, bold font. Below that is **DOLE 4EA x 2LB**. A date field shows **Dec 05** with the text 'Pack Date/ Empaqueté le' above it. A box contains **Grown In/Cultivé en California, USA**. The grade is **Grade A/Catégorie A**. At the bottom left is the responsible party: **Dole Fresh Vegetables, Monterey, CA 93940**. A smaller barcode is followed by the PLU number **07143 00115** and a white box with the voice pick code **24 83**.

Human Readable Date
Harvest Date **OR** Pack
Date **OR** Best if Used
By /Use By/Best
Before Date
(Font Size 9)
Date Font Size 14

Voice Pick
Code
(Black Text in
White Box)
(Font Sizes:
Small numbers
14, large 24)

FINAL

Name/Variety of Item (Font Size 18),
Size/Packaging (Font Size 18), Grown in State/Province
Country (Font Size 14), Grade (if required Font Size 10),
& Responsible Party (Font Size 12)

PLU Number for Case Containing **Bulk**
Items **OR**
UPC Barcode for Cases Containing
Prepacks

A FEW NOTES RE STANDARD LABEL IMPLEMENTATION

- **Font Size** – industry requested guidance on font size to ensure clarity in both label preparation and legibility across the supply chain and in DCs. It is understood that additional requirements (e.g. state requirements) may mean additional text is required which may impact font size – if that is the case suppliers should ensure their trading partners are aware of why font sizes may differ.
- **UPC & PLU Inclusion** – just a reminder that this is typically an either/or situation as the code on the label should match the code on the item inside the case - **this is the same rationale for choice of date on the case**. (In some specific instances an item may have both the UPC and PLU on the consumer item – if that occurs both should also appear on the case label.)
- **Languages included on the label** – Because this is a label designed to “label once/use twice” in terms of compliance with buyer requirements in both the U.S. and Canada, French is included in the label. If you are confident your product will only be shipped within the U.S., certainly there is no need to include French.

A FEW NOTES RE STANDARD LABEL IMPLEMENTATION

- **Grown In information – Single Commodities:** In the U.S. and Canada, the province/state (or region for romaine) is required – for all other countries *Grown In* would only require the country. If the commodity was sourced from multiple origins, list each of them.
- **Grown In information - Multiple Ingredients** – Space restrictions limit the ability to list each ingredient/origin pair.
 - When case contents include multiple ingredients, but **do not include romaine**, indicate “multiple:” and list the countries of origin.
 - When multi-ingredient contents **do include romaine**, indicate “multiple/rom:” and list countries of origin. This will indicate to the supply chain that romaine is contained in the case, and, in the event an advisory is issued, the case should be opened to identify growing regions printed on the consumer unit.
- More specific guidance will be included in the **PTI Best Practices for Formatting Case Labels** – that document will be updated and re-posted on the PTI website (<https://www.producetraceability.org/>) once the work is complete.
